

CELIER Aviation

XENON

make your dream come true

Keep your eyes on the stars, and your feet on the ground. Theodore Roosevelt

Despite being an outcome of dreams and desires, Xenon is perfectly thought-out in every detail. Its creators', Raphael Celier's, long-standing experience resulted in applying state-of-the-art. technology in both design and production. Safe, flying superb in various conditions, Xenon built under Raphael's supervision will provide you with a great deal of pleasure. Our team of highly-skilled specialists will never let you down.

The Celier Aviation team is fulfilling your dreams.

XENON

Xenon — great things come from dreams

And Xenon does both, it fulfills our dreams, because we were striving to create the perfect aircraft, and it fulfills your dreams, since it gives you the chance to soar above the world. It allows you to ascend high, where there is only you and the birds, it even gives you the possibility to revel in a completely fresh point of view. Xenon – a completely fresh point of view.

If you could do anything in the world, what would it be? Would you climb up the highest mountain? Would you become a world champion? Would you sing on the greatest stages of the world? Or maybe you would fly high up in the air like the birds do? It is dreams and the overwhelming desire to soar that created Xenon. Fulfilling your dreams is a wonderful thing, fulfilling someone else's – even greater.
